## Experience

### Future Tech

#### Business Owner

April 2016 - Present (9 years 7 months)

Inventor of the equation of creation. With the equation  $E=E^q$  I have created a quantum. I theorized that creationism could be possible with a quantum; a set of rules that rule over energy. My formula states that Energy =  $\text{Energy}^{\text{quantum}}$ . Thus energy of belief could charge a quantum that rules over energy. For example 1 billion people believing that God conjured this universe, will create a quantum with the energy of belief, that would allow God to conjure the universe.
